PROFILE

I am a highly motivated and hardworking undergraduate seeking beginner employment role to enhance and explore my skills and knowledge about what I learn from the University. I am interested in Web Devolopment and I eager to apply my kills and knowledge to contribute to a dynamic and innovative team. I did solid learning of some programming languages, database management and software development.

RECENT PROJECTS

Presantation Schedule Mobile App
2025 -
React Native

- Developed a React Native app for university presentation management, including user registration, scheduling, marks entry, and an AI assistant.
- The admin panel manages students, presentations, evaluations, and staff.

A Cooking Skill- Sharing and Learning Platform
2025 -
Springboot

- A web-based app for sharing cooking skills and learning new recipes in a social, interactive environment. Users can create, manage, and share recipes, track progress through structured cooking plans, and engage via likes, comments, and notifications.

Travel Planning System
2024 -
Mern Stack

- A comprehensive web-based travel planning system that streamlines trip management with features like vehicle rental, user management, event management, camping item management, hotel management, package management, and feedback management. Designed to enhance user experience by simplifying bookings, reservations, and travel coordination.

Gym Management System
2024 -
Mern Stack

- Gym Management System is an all-in-one platform designed to streamline gym operations by managing users, training sessions, supplement inventory, meal plans, and finances. It helps gym owners and trainers efficiently track progress, organize schedules, and support members with personalized plans for fitness and nutrition.
